DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 4-6 or 7-9 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over
Nguyen et al. (5,949,282).

Nguyen et al. (Fig. 2a) disclose the claimed invention except utilizing a detector for receiving PWM waveform control signal. Nguyen et al. disclose an AUDIO_IN inputs to error amplifier circuit (207), a PWM (101) receives a signal ADJ_OUT and transforms into a digital signal DIG_OUT, and DIG_OUT is fed into output stage (102) which inherently seen comprising FET transistor switches corresponding to HI_OUT and LO_OUT, and filters (103, 104) for removing switching noise FROM OUTPUT STAGE (102) and providing an averaged output to drive a speaker. Since PWM (101) of Nguyen et al. and a detector (15) of claimed invention are functionally equivalent as (see page 5, lines 6-8 of applicant's invention), thus, utilizing one of these devices (PWM/detector)

would have been an obvious matter of design choice in the absence of unexpected result. Also, both Nguyen et al. and applicant's invention are structurally similar, thus, the overall circuit operation would be inherent.

Conclusion

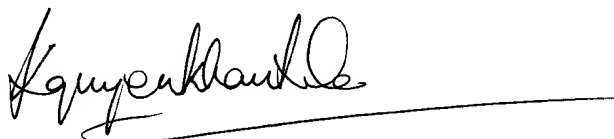

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Khanh V. Nguyen whose telephone number is (703) 306-9058. The examiner can normally be reached from 8:00 AM-5:00 PM.
